

BIBLIOGRAPHIC AND JOURNAL UPDATE MARCH 2019

N. Ernst Boris, M.L.I.S. International Centre for Diffraction Data, Newtown Square, PA

This past year, with the help of Terry Kahmer, our Consulting Editor, we reviewed 161 files containing 9,165 results from STN and publisher sites. Additional manual review of select titles was done at different libraries. These results include journal articles, conference proceedings, patents, and dissertations. The Database Department entered 1,371 Writes and sent to corresponding authors requesting data. Additionally, 6,072 (Experimental, Contributed, GiA, and Organics) patterns were submitted. The Senior Bibliographer is constantly exploring new tools for electronic searches, titles to review and new locations to review content.

Also this past year ICDD in collaboration with its publisher, Cambridge University Press, published four issues of Powder Diffraction. Additionally, guest editors began review of manuscripts for the upcoming supplement issue of the European Powder X-ray Diffraction Conference (EPDIC16). Look for the EPDIC16 Proceedings coming soon in 2019. Upcoming in the March 2019 issue also look for specially invited Metal Organic Framework (MOF) manuscripts. We will be publishing more MOF papers later in the year. In 2020, a supplement issue with invited papers from The 25th International Congress on X-ray Optics and Microanalysis in collaboration with the 68th Annual Denver X-ray Conference is expected.
