

ICDD Technical Committees

X-ray Fluorescence Subcommittee - **Mark Rodriguez, Chair**

The X-ray Fluorescence Subcommittee will provide recommendations for X-ray Fluorescence to be a complement to both the PDF and ICDD. This entails synergistic interchange between data collected from XRD and XRF:

Use of chemical composition to support powder diffraction analysis

Ability to improve chemical composition by use of the powder diffraction

To ultimately obtain simulated XRF data as a means of material analysis validation such as refinement of data from multiple analytical methods

In addition, the subcommittee shall develop new educational opportunities for ICDD and offer guidance on addressing elemental composition issues which are of strategic interest to ICDD.
