

POWDER DIFFRACTION FILE SUBFILE DEFINITIONS

The ICDD Editorial Staff, Consulting Editors and Volunteer Editors

This poster displays the subfile definitions that are currently being used to code entries in the Powder Diffraction File. Defining each subfile was the first task in creating subfile uniformity throughout the PDF. Automated procedures, for the initial assignment, have been applied to several of the subfiles with the intention of automating almost of all of them in time. The initial assignments have been sent to volunteer specialists for further review.

Your help in further defining the subfiles would be appreciated. Please see Frank McClune, Suri Kabekkodu or Tim Fawcett with your input.
