

AGENDA
X-ray Fluorescence Subcommittee
Wednesday, 13 March 2019
International Centre Headquarters
Conference Room D
10:00 a.m. – 11:00 a.m.
Mark Rodriguez, Chairman

1. Call to Order M. Rodriguez
2. Appointment of Minutes Secretary Denise Zulli
3. Approval of 2018 Minutes
4. Review of Mission Statement

The X-ray Fluorescence Subcommittee will provide recommendations for X-ray Fluorescence to be a complement to both the PDF and ICDD. This entails synergistic interchange between data collected from XRD and XRF:

- Use of chemical identification to support powder diffraction analysis
- Ability to improve chemical composition by use of the powder diffraction data
- To ultimately obtain simulated XRF data as a means of material analysis validation such as refinement of data from multiple analytical methods

In addition, the subcommittee shall develop new educational opportunities for ICDD and offer guidance on addressing elemental composition issues which are of strategic interest to ICDD.

5. Board of Directors' Liaison Report X. Chen
6. Discussion regarding possibly of implementing compatibility of database microanalysis tool with other vendor search/match programs.
7. New Business
8. Adjournment
