

Powder Diffraction

An International Journal of Materials Characterization

Published quarterly by Cambridge University Press
(with topical supplements)

Powder Diffraction journal is an online-only, hybrid open access journal focuses on materials characterization employing X-ray powder diffraction and related techniques. With feature articles covering a wide range of applications, from mineral analysis to epitactic growth of thin films to advances in application software and hardware, this journal offers a wide range of practical applications.

- Techniques and procedures in X-ray powder diffractometry
- Advances in instrumentation
- Study of materials including organic materials, minerals, metals and thin film superconductors
- Publication of powder diffraction and related data on new materials
