

Powder Diffraction

An International Journal of Materials Characterization

Published quarterly
(with topical supplements)

Powder Diffraction journal is an online-only, hybrid open access journal focuses on materials characterization employing X-ray powder diffraction and related techniques. With feature articles covering a wide range of applications, from mineral analysis to epitactic growth of thin films to advances in application software and hardware, this journal offers a wide range of practical applications.

Powder Diffraction Journal 40th Anniversary (1986-2026)

Dugarte-Dugarte, A. J., Toro, R. A., Van De Streek, J., Henao, J. A., Díaz De Delgado, G., & Delgado, J. M. (2022). Crystal structure from laboratory X-ray powder diffraction data, DFT-D calculations, and Hirshfeld surface analysis of (s)-dapoxetine hydrochloride. 37(4), 216–224. DOI: 10.1017/S0885715622000380

- Techniques and procedures in X-ray powder diffractometry
- Advances in instrumentation
- Study of materials including organic materials, minerals, metals and thin film superconductors
- Publication of powder diffraction and related data on new materials
