PDF-5+: Exporting Raw Data

Make sure “Raw Diffraction Data” is checked

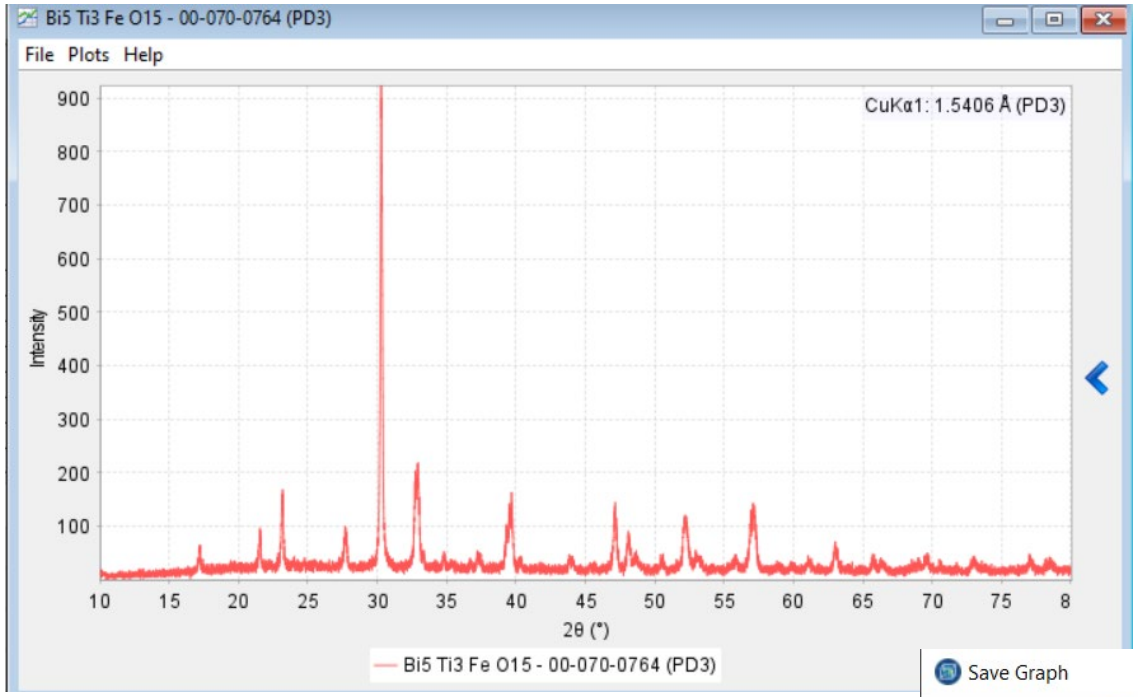

Perform the search based on your interest (elements, subfiles etc)

For example, here we’ve chosen “Star” quality patterns containing elements ‘Ti’ and ‘O’

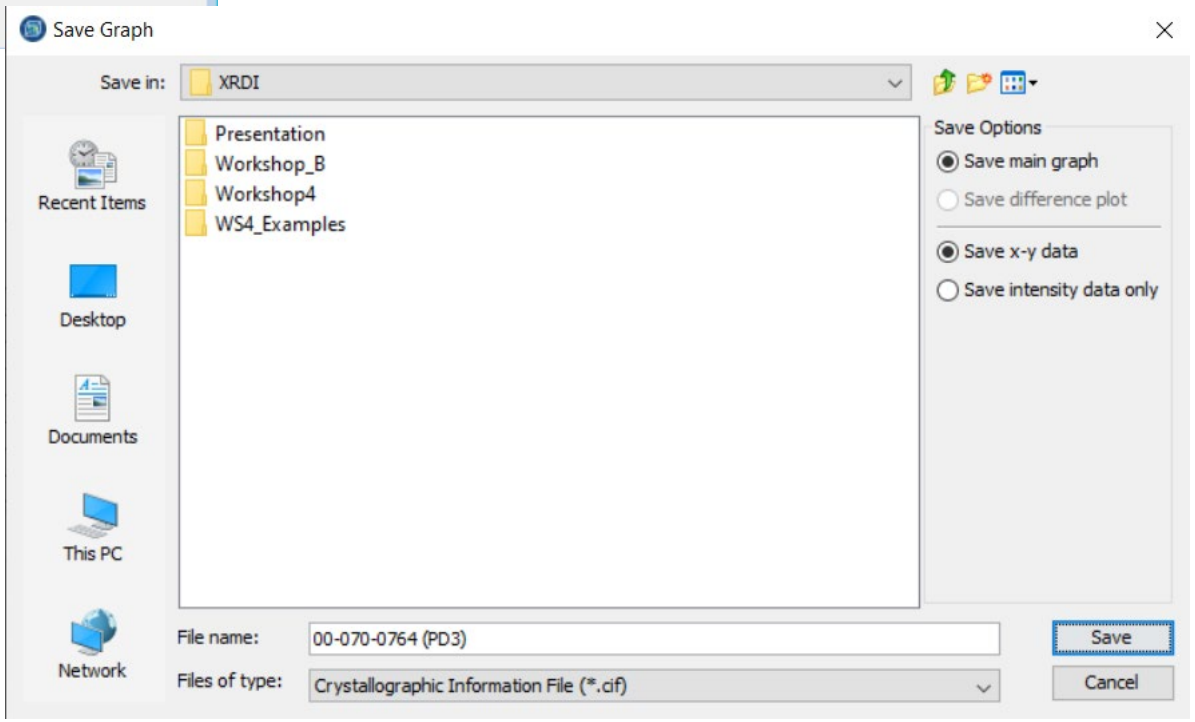

From the result window, click on a PDF# to display

Click on “Raw Diffraction Data”

Under File menu, click on “save”

Save in *.CIF or *.XY format

Exercise

- Import saved file (*.xy) into WinPLOTR or PreDICT
- Try indexing and compare the result
- Try the same exercise using JADE
